

www.thesciencejobs.in

Domain name - www.thesciencejobs.in

Objective - To make a job website where science and engineering research and academic jobs and research positions are listed for students and other job/position seekers. Additionally it will include private industry and global positions for scientific jobs offered for India.

Company - TechnoConcept India Pvt Ltd.

Prospective audience - Job-seekers like students, research scholars, faculties and above graduates, post graduates and working professionals in scientific and engineering institutions in academic and industry.

Target Geographical area - India to begin with

Job-postings - Job posting is something unique for this website. All govt scientific or engineering academic institutions will be allowed to post their requirements FREE OF CHARGE but private industry and global postings would be paid for listing of positions.

Subscription plan for job seekers - Job seekers can avail the posted information by email and can have access in their inbox by signing in to their account. To access information and receive regular emails, job seekers need to subscribe to plans.

Plan Basic - Free - Info from 5 institutes - 5 industry - one job category

Plan Deluxe - 500 per month - Info from 25 institutes - 25 industry - one job category

Plan Premium - 1000 per month - Info from unlimited institutes - unlimited industry - one job category (include in some plan)

The Website should have a lot of scope to run the advertisement. A complete advertisement panel shall be required.

The website should also have a “match-making” kind of option to auto-send the resume of candidates to matched listings.

We will

Important points:

1. Govt job postings will only be done from academic email id and mobile number. Otp security will be taken care. Personal email ids will not be honored for such postings.
2. Payment plan for the listing of positions by private and global job postings.
3. We need to create a list of categories for job postings and job seekers e.g. Research Associates, JRF, SRF, Asst Professor etc.

4. We need to create a list of subject domains and subdomains for job postings and job seekers e.g. Life Sciences (Subdomain - Mol Bio, Immunology etc.) Physical sciences, etc.
5. We need to create a template for job postings with PDF and jpg upload options.
6. Template for job seekers with their sign ups and job seekers.
7. Blogs - how to apply, resume making, how to prepare for interviews etc.
8. Advertisement posting options.

1. Create email ID.
2. Identify a mobile number
3. Facebook Page
4. LinkedIn page
5. Instagram Page
6. Logo
7. Letterhead
- 8.
